

To Fellow Founders & Product Leaders

If you're building a serious SaaS product and care deeply about user experience—you need someone like Luca on your team.

Luca was one of our first and lead UI/UX Designer at klink.cloud, and he's the one who shaped the entire product experience from the ground up. From early concepts to an enterprise-ready SaaS platform, Luca led the UI/UX with full ownership, creativity, and precision.

He's more than just a designer—he's a product thinker. He understands SaaS UX patterns, knows how to simplify complex flows, and always designs with both user empathy and business goals in mind. Our customers regularly compliment the clarity and usability of our platform—and that's a direct reflection of Luca's design leadership.

Working with Luca was effortless. He's fast, reliable, and proactive. He collaborates well with both product managers and engineers, and consistently delivers high-quality work under tight timelines.

I would absolutely rehire Luca again in the future. He's a rare talent who can take your product experience to the next level.

If you're scaling your product or laying the foundation for a world-class UX, Luca is someone you want on board.

Feel free to reach out to me if you'd like to hear more about our experience.
